

## ThinPATH Portal Version 3.2

Date: January 17, 2003  
PMN: #113  
Distribution: Worldwide  
Author: Tim Kellogg

### Overview

NCD ThinPATH Portal, the one management tool for both thin clients and PCs, now has a 1-step install module. Available today, NCD ThinPATH Portal version 3.2 may be downloaded from the NCD web site. With version 3.2, the administrator no longer has to install several separate components in order to have Portal support for ThinSTAR terminals<sup>1</sup>. This makes installation easier and quicker. Support for ThinSTAR terminals are included in the version 3.2 Portal installation module. Also available are the optional ThinPATH Desktop Mirror and ThinPATH Plus modules.

### ThinPATH Portal V3.2 Component Versions

ThinPATH Portal version 3.2 contains the same versions of components as ThinPATH Portal version 3.1. Version 3.2 of the Portal module includes the following versions of components:

- Portal Explorer v1.4.34
- ThinPATH PC v1.4.32
- Portal Client v1.2.4

Note that ThinPATH Portal version 3.2 will **not** upgrade a version 3.1 Portal installation. Version 3.1 and its update components are still available on the NCD web site. The next Portal release (version 3.3), which will introduce new functionality to the Portal, will be an upgrade to both 3.2 and 3.1.

<sup>1</sup> ThinSTAR terminals supported: TS532.NET/564.NET, TS532LX, TS500, TS450, TS400, TS332Web, TS332, TS300 and TS232.
