

## **ThinSTAR 500.NET Operating Software Update**

Date: February 28, 2003  
PMN: #117  
Distribution: Europe  
Author: Tim Kellogg

### **Overview**

Available immediately, NCD is offering version 6.0.106 of ThinSTAR 500.NET operating software free of charge. This software is available via the NCD downloads web page at [www.ncd.com](http://www.ncd.com).

### **Enhancements & Bug Fixes**

The following is a list of version 6.0.106 enhancements and bug fixes since the last release of ThinSTAR 500.NET operating software.

- Additional European Keyboard Settings are now available under the terminal's Control Panel:
  - Latvian
  - Slovene
  - Romanian
  - Lithuanian
  - Hungarian
  - Estonian
  - Czech
- The correct ICA client build number (6.3 build 1059) is now displayed on the inventory tab of the terminal.
- Terminals upgraded from version 6.0.105 to 6.0.106 will not perform a factory reset.
- The ThinSTAR 500.NET installation module was built with Installshield Developer 8.0

### **Additional Technical Information**

For additional technical information concerning this release, see the Installation Guide on the NCD downloads web page.
