ThinPATH Manager Licenses for ThinPATH Portal

Date: April 17, 2003
PMN: #123
Distribution: Worldwide
Author: Tim Kellogg

Overview

Customers who are using current NCD ThinPATH Manager licenses may use these same licenses for NCD ThinPATH Portal access licenses. The key word in this previous sentence is current. NCD has offered different versions of ThinPATH Manager licenses during the past four years. The older versions of these ThinPATH Manager licenses are not compatible with the ThinPATH Portal product.

How to Identify Older Licenses

The current ThinPATH Manager license contains the SKU “0526” as the first portion of the license. Therefore, any ThinPATH Manager license that begins with 0526 is compatible with the current ThinPATH Portal.

The older ThinPATH Manager licenses that begin with either “0510” or “0520” are not compatible with ThinPATH Portal.

Upgrade Policy

The latest version of ThinPATH Manager is not a free upgrade for customers who purchased the earlier version of ThinPATH Manager; and therefore, customers using the older version of ThinPATH Manager must pay for the ThinPATH Portal access licenses.
