

## **ThinPATH Terminal Emulation for Linux**

Date: February 4, 2003  
PMN: #116  
Distribution: Europe  
Author: Tim Kellogg

### **Overview**

Available immediately, NCD is now offering ThinPATH Terminal Emulation for Linux as an option for the TS532LX product. ThinPATH Terminal Emulation for Linux (version 4.6.1) offers one of the most complete sets of terminal emulation packages available in the market today. It provides a key solution for assisting customers with their migration to the TS532LX product. ThinPATH Terminal Emulation for Linux allows TS532LX users the ability to access their legacy applications while also accessing their Windows application using either of the built-in ICA or RDP clients on the TS532LX.

### **Product Code and Pricing**

The product code for Terminal Emulation for Linux is TP-TELX-F1. The list price is \$30 USD. Customers should purchase one TP-TELX-F1 for each TS532LX they plan to use with this emulation package.

### **Deliverable**

The deliverable for TP-TELX-F1 is a certificate of purchase that provides a URL, which informs the customer where to download the install module. The Terminal Emulation for Linux install module is loaded on the ThinPATH Portal for deployment to TS532LX terminals.

### **Emulation Supported**

The following table lists all of the different terminal emulation modes supported in the TP-TELX-F1 product.

ADDS A2	IBM 3151	Siemens 97801	Viewdata 80
